PERSONNAL STATEMENT

Data Science MS candidate with 3+ years of enterprise experience at Oracle Cerner delivering production-grade ETL pipelines, machine learning models, and BI solutions across 1M+ record datasets. Proven ability to turn raw, complex data into decisions that drive measurable business outcomes — from cutting operational costs to detecting fraud at scale.

EDUCATION

Syracuse University, School of Information Studies, Syracuse, NY **Aug 2024 – May 2026**
Master of Science, Applied Data Science

New Horizon College of Engineering, Bangalore, India **Aug 2018 – Jul 2022**
Bachelor of Engineering, Information Science and Engineering

Related Coursework: Introduction to Data Science, Applied Machine Learning, Data Warehouse, Business Analytics, Big Data Analytics, Lean Six Sigma, Visual Analytics, Python Programming, Database Management Systems

SKILLS

Data & Programming: Python (Pandas, NumPy, PySpark), SQL, R, T-SQL
Machine Learning & Statistics: Regression, Classification, Time Series Forecasting, NLP (BERT, Hugging Face), Scikit-learn, TensorFlow, Hypothesis Testing, XGBoost, Feature Engineering
Data Engineering: ETL/ELT Pipeline, Data Modeling, Data warehousing, Snowflake. Spark, dbt, SQL Server, PostgreSQL, REST APIs, Data Cleaning & Wrangling
Analytics & BI: Tableau, Power BI, Excel, Infor Lawson BI, Infor dEPM, Infor Birst, Crystal Reports

PROJECTS

Bird Migration Data Warehouse (dbt, snowflake, PowerBI, SQL) **Aug 2025 – Dec 2025**

- Designed Engineered an end-to-end ELT pipeline on Snowflake using dbt — transformed 100K+ records across 4-layer architecture (RAW → STAGING → CORE → MART), improving query performance by 30% and data consistency by 35%, enabling self-service analytics for researchers and conservationists.
- Designed star schema data warehouse with fact/dimension tables and built Power BI dashboards that cut stakeholder analysis time by 40%, directly supporting data-driven decisions in wildlife migration pattern research.

Aviation Delay Analysis Dashboard (Tableau, Python, FAA/ OpenAPIs) **Jan 2025 – April 2025**

- Developed a Integrated and analyzed 500K+ flight records from 3 public data sources; identified a statistically significant 27% delay increase tied to ATC staffing shortages — findings applicable to airline scheduling optimization and policy recommendations.
- Deployed Tableau dashboards with time-series forecasting models, improving delay predictability by 35% and reducing stakeholder decision time by 40%; insights usable by airports to reduce estimated $8B+ annual industry delay costs.

Health Insurance Fraud Detection (Python, XGBoost, MySQL) **Jan 2022 - April 2022**

- Developed a Built ML pipeline (XGBoost + SVM) achieving 20% reduction in fraudulent claims and 30% faster data processing — published at IEEE ICETET-SIP-22, demonstrating real-world applicability to insurers managing multi-million-dollar fraud losses annually. (Publication: Health Monitoring System Using IOT).

WORK EXPERIENCE

Solution Architect (Oracle Cerner, Bangalore, India) **Sep 2023 – July 2024**

- Architected ETL/ELT pipelines and BI data models processing 1M+ records/cycle across Finance and HR — reduced pipeline processing time by 20% and manual reporting effort by ~15 hrs/week, saving an estimated $40K+ annually in operational costs.
- Mentored and guided 3 junior analysts on SQL optimization, data modeling best practices, and Agile delivery — improving team throughput by ~25% across sprint cycles.
- Delivered KPI dashboards (Power BI, Infor Birst/dEPM) and led UAT for 5+ reporting modules, translating complex data requirements into HIPAA-compliant solutions for 1,000+ end users across Finance, HR, and Payroll business units.

Technical Solution Analyst 1 (Cerner Healthcare Private Limited. Bangalore, India) **May 2022 – Aug 2023**

- Developed 20+ BI dashboards and SQL-based reporting pipelines (Infor Lawson BI, Crystal Reports) across HR, Payroll, and Finance — reduced data retrieval latency by 25% and enabled analytics across high-volume daily/weekly datasets for 500+ stakeholders.
- Identified and resolved recurring data anomalies through proactive UAT and data validation, preventing downstream reporting errors estimated to affect ~$2M in payroll processing accuracy per quarter.

Technical Solution Intern (Cerner Healthcare Private Limited. Bangalore, India) **Dec 2021 – May 2022**

- Optimized SQL/T-SQL queries and supported ETL validation for enterprise reporting workflows — improved query performance by 30% and ensured data accuracy across daily operational pipelines.
